Master of Public Policy, Gerald R. Ford School of Public Policy, University of Michigan
Bachelor of Arts in Economics, Howard University

May 2025

May 2017

EXPERIENCE

Data & Policy Analyst, Poverty Solutions

June 2025 - Present

- Analyzed Census data to generate estimates of public assistance eligible children in the state of Michigan.
- Provided data support for a grant-funded project on the intersections between foster care services and youth homelessness.

Research Assistant, Poverty Solutions

September 2023 - May 2025

- Enrolled applicants—both in person and virtually—for a guaranteed income Randomized Control Trial (RCT).
- Coordinated with RA team to verify income, residency, and identification documentation for eligible applicants.
- Wrote cleaning code, documentation, and visualizations to analyze first-wave survey data, culminating in a baseline report for community partners and other researchers.

Mayoral Fellow, City of Chicago, Office of the Mayor

June 2024 – Aug 2024

- Coordinated the implementation of an interagency homelessness task force, drafted planning materials, tracking tools, and communications to support cross-departmental efforts.
- Led listening sessions Community Service Center management, compiled feedback that led to a redesigned client satisfaction survey in collaboration with Department of Family and Support Services analysts.
- Researched policy and drafted memoranda to support the Mayor's Office of Policy on approaches to increasing equity in municipal fines and fees.

Senior Research Analyst, Inclusive Economy Lab – University of Chicago

August 2020 - August 2023

- Tested, iterated and implemented code with other analysts for sample selection, randomization, analysis, and data management for three basic income randomized control trials (RCTs) in Chicago and Cook County.
- Served as lead liaison to the coordinating body for homeless services, coordinating quarterly transfers of data in Chicago and negotiating research access agreements.
- Developed and tested automated reporting in SQL, providing technical assistance to improve data quality and reporting on homelessness in Chicago.
- Co-designed and deployed a housing stability dashboard, disseminating high-frequency snapshots of leading indicators of housing instability within Chicago to support agencies and non-profit organizations.

Senior Research Assistant, Federal Reserve Board, Research and Statistics Division

July 2017 - August 2020

- Conducted research related to the US housing market with economists in the Real Estate Finance (REF) section using Stata, R, and other statistical programming languages.
- Aggregated and visualized economic indicators used to inform principals on economic conditions related to the US housing market.
- Wrote, updated, and documented code used to produce data for policy and research.
- Managed and utilized US mortgage data to monitor the lending patterns of financial institutions, including loan-level HMDA, Corelogic, and Equifax data.
- Trained incoming RAs on section production processes and outputs.
